

Kolumnen Generation ska ses som en vägledning i hur många generationer som det har gått från den första DNA-testade Individ (P).

F1 innebär att det är första generation efter en testad individ. Testad individ är P (Parent generation)

F2 innebär att individen är andra generation från en testad individ. DNA-testad individ - Hereditärt fri (F1) - Hereditärt fri (F2)

F3 innebär således att individen är 3e generationen från en testad individ. DNA-testad individ - Hereditärt fri (F1) - Hereditärt fri (F2) - Hereditärt fri (F3)

DNA-testet för DEN lanserades för rasen 2015. Då rasen nu har individer som har nått upp till 4e generation efter DNA-testad individ, har klubben beslutat om att göra en komplettering i listan med en kolumn som anger antal generationer som individen är efter en DNA-testad individ. Kolumnen för Generation i översikten nedan är en förhoppning om att lättare tydliggöra hur många generationer en individ ligger från första DNA-testad individ. SKK har infört begränsning (våren 2021) i antal generationer för *hereditärt fri individ*. Detta medför att även Tollarklubben inför begränsningar för hereditärt fria individer för DEN listan. Du som har en individ som är hereditärt fri F3, behöver numera testa F3 individen för att valparna efter en sådan individ, ska komma upp på DEN-listan som hereditärt fri. Var och en ansvarar själva för att kontrollera så att känt DNA-resultat föreligger bakåt i leden innan parning. Det finns F4 individer med på listan, då dessa kullarna föddes innan SKK gick ut med begränsningar i antal generationer för hereditärt fri.

Normal/Clear/Frisk

Hereditärt fri

Carrier/Bärare

Affected/At risk/Sjuk
